Incident #53 -- near Lake Meade, Nevada -- 28 June 1947

There appears to be nothing astronomical about this incident.

According to the observer, the objects had a speed of 285 MPH and were moving on a course of 120° . Now, since the plane was moving at 285 MPH on a course of 300° , it is possible that the observed motion of the objects was only apparent (since 180° plus 120° equal 300°), and we can conjecture that a cluster of balloons (cosmic ray apparatus perhaps) was observed, the motion of which was merely a reflection of the motion of the plane.

MEMORANDUM FOR THE OFFICER IN CHARGE:

1. On 14 July 1947, 1st Lt. [REDACTED], 170th AAF Base Unit, Ferry Division, Brooks Field, San Antonio, Texas was interviewed and the following information was obtained: Lt. [REDACTED] departed Williams Field, Arizona at 1400 CST on 28 June 1947 in a P-51 for Portland, Oregon, by the way of Medford, Oregon. At approximately 1515 CST on a course of 300 degrees, and ground speed of 285, altitude 10,000 feet, approximately thirty miles northwest of Lake Meade, Nevada Lt. [REDACTED] sighted five or six white, circular objects at four o'clock, altitude approximately 6,000 feet, courses approximately 120 degrees and an estimated speed of 285 MPH. Lt. [REDACTED] said the objects were flying very smoothly and in a close formation. The estimated size of the white objects were approximately 36 inches in diameter. Lt. [REDACTED] stated that he is sure the white objects were not birds, since the rate of closure was very fast. Lt. [REDACTED] was certain that the white objects were not jets or conventional type aircraft since he has flown both types.

AGENT'S NOTES:

Lt. [REDACTED] was very sincere in the explanation and was not the exaggerating type. He merely stated that he saw and has drawn no conclusions as to what the white objects were.
